

WHAT IS CLAIMED:

1. A method comprising:
storing content on a storage device;
5 detaching the storage device from a recorder/playback device; and
displaying the content on the storage device.
2. The method according to Claim 1 further comprising connecting the
storage device and the recorder/playback device.
10
3. The method according to Claim 1 further comprising transmitting the
content from the recorder/playback device to the storage device.
4. The method according to Claim 1 further comprising selecting a particular
15 content to display on the storage device.
5. The method according to Claim 1 further comprising selecting a mode to
display content.
- 20 6. The method according to Claim 6 wherein the mode includes displaying a
single piece of content.

7. The method according to Claim 6 wherein the mode includes sequentially displaying multiple pieces of content.

8. The method according to Claim 6 wherein the mode includes
5 simultaneously displaying multiple pieces of content.

9. The method according to Claim 1 wherein the recorder/playback device is a digital camera.

10 10. The method according to Claim 1 wherein the recorder/playback device is a video camera.

11. The method according to Claim 1 wherein the recorder/playback device is an audio recorder/player.

15

12. The method according to Claim 1 wherein the recorder/playback device is a computer.

13. The method according to Claim 1 wherein the recorder/playback device is
20 a television.

14. A system comprising:

means for storing content on a storage device;

means for detaching the storage device from a recorder/playback

5 device; and

means for displaying the content on the storage device.

15. A storage device, comprising:

a storage module to store content;

10 a display module to display the content within the storage module;

and

an interface module for receiving the content from a

recorder/playback device.

15 16. The device according to Claim 15 further comprising an attachment area
for connecting the storage device to another object.

17. The device according to Claim 16 wherein the object is the
recorder/playback device.

20

18. The device according to Claim 15 wherein the interface module connects
with the recorder/playback device via a wireless network.

19. The device according to Claim 15 wherein the interface module receives an instruction to select a particular piece of the content to display.

20. The device according to Claim 15 wherein the interface module receives
5 an instruction to select a mode to display the content.

21. A computer-readable medium having computer executable instructions for performing a method comprising:

10 storing content on a storage device;
detaching the storage device from a recorder/playback device; and
displaying the content on the storage device.
